**Senior Web Application Developer**

Textmimedia Ltd., Manchester (United Kingdom)

I was part of a team of 11 developers who managed to implement a very big sport portal (<http://www.gamedayxtra.com/>), scaling up to at least 500k users. We used the latest AWS technologies, Elasticsearch, MongoDB, Lumen and AngularJS on frontend.

My main responsibilities at this company included:

- web application development using Laravel, Zend 1, WordPress, Angular, jQuery, Bootstrap etc.;
- planning, analysis, implementation, testing, maintenance;
- REST API implementation: Kohana, Lumen, MongoDB;
- server administration on Amazon Web Services;
- team management: coordinated a group of backend developers, made sure all of them have task to do and clear specifications;
- client relationship, team coordination and project management;
- sprint planning and applying agile scrum methodologies.

## ADDITIONAL INFORMATION

- About me** I am a hard working, highly motivated, reliable Senior Web Developer with over 9 years of experience in the industry. My strong points start with deep understanding of web technologies, following high quality standards and working independently. I like reading documentations and I think this motto characterizes me the best: First, solve the problem. Then, write the code.
- Objective** Working at a company that would allow me to be part of a dynamic team to share acquired knowledge and gain new ones in software development and beyond;
